

1. CAPITAL - ASSESSMENT AND ADEQUACY - BASEL III SPECIFIC

1.1 Capital Adequacy Framework

Capital Management aims to safeguard the Bank's ability to continue as a going concern so that it could continue to provide adequate returns to shareholders by pricing products and services commensurately with the level of risk. For this the Bank ensures strong capital position and efficient use of capital as determined by the underlying business strategy i.e. maximizing growth on continuing basis. The Bank maintains a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The impact of the level of capital on shareholders' return is also recognised and the Bank recognises the need to maintain a balance between the higher returns that might be possible with greater gearing and the advantages and security afforded by a sound capital position.

i) Goals of Managing Capital

The main objective of the capital management is to improve the financial position and strengthen the statement of financial position of the Bank to support the growth in business, provide protection to depositors and enhance shareholders' value. The Bank's Board and the management is committed to maintaining a sound balance between depositors' liability and shareholders' funds so that optimal capital / debt ratio is maintained. The optimal capital / debt ratio will provide reasonable assurance to depositor's about safety and security of their funds and at the same time provide impetus to the management to invest their depositors' funds into profitable ventures without compromising the risk profile of the Bank

ii) Statutory Minimum Capital requirement and Management of Capital:

The State Bank of Pakistan (SBP) vide circular no.7 dated April 15, 2009 had set the Minimum Capital Requirement (MCR) for banks of Rs 10 billion to be achieved in a phased manner by December 31, 2013. The paid up capital of the Bank for the year ended December 31, 2021 stands at Rs. 12.47 billion and is in compliance with the SBP requirement for the said year.

iii) Capital Adequacy Ratio (CAR):

The Capital Adequacy Ratio (CAR) assesses the capital requirement based on the risks faced by the banks. The Banks are required to comply with the CAR as specified by SBP on standalone as well as consolidated basis.

Accordingly, the Bank has assessed and reported its Capital Adequacy Ratio in these financial statements on the basis of BASEL III requirements as prescribed by SBP.

After the pandemic of COVID 19 occurs in 2020, SBP via BPRD Circular Letter No. 12 of 2020 has reduced Capital Conservation Buffer (CCB) from 2.5% to 1.5% and new Capital Adequacy Ratio requirement stands at 11.50%.

2. Scope of Applications

The Basel-III framework is applicable to the Bank on a standalone basis as the Bank does not have a subsidiary. Standardized Approach has been used for calculating the Capital Adequacy for Credit and Market risk, whereas, Basic Indicator Approach (BIA) is used for Operational Risk Capital Adequacy purposes.

3. Capital Structure

Bank's regulatory capital has been analyzed in two tiers;

- Common equity Tier 1 capital (CET 1), which includes fully paid up capital, discount on issuance of shares, statutory reserves, accumulated losses and regulatory adjustments applicable on CET 1.
- Tier 2 capital, which includes subordinated debt/instrument, general provisions for loan losses (upto a maximum of 1.25% of credit risk weighted assets) and reserves on revaluation of investments.

Credit Risk - General Disclosures

The Bank has adopted Standardised Approach, under Basel III.

Credit Risk: Standardized Approach

The Bank use rating assigned by JCR-VIS and PACRA as External Credit Assessment Institutions (ECAI) for the purpose of risk weighing its exposure. In the case of foreign currency exposure, ratings assigned by Fitch and Moody's have been applied.

Following are the types of exposure for which each agency is used:

	Exposure	Fitch	Moody's	JCR-VIS	PACRA
Corporate		-	-	~	~
Banks		✓	•	✓	~
Sovereigns		✓	-	-	_

Most of the Bank's asset base is short or medium term. Therefore, the Bank uses the entity's rating to assess the risk of its exposure without any adjustments.

For exposure amounts after risk mitigation subject to the standardised approach, amount of Bank's outstandings (rated and unrated) in each risk bucket as well as those that are deducted are as follows:

Exposure	Rating category No.	Amount outstanding	Deduction CRM*	Net Amount
