

EMIRATES GLOBAL ISLAMIC BANK LIMITED NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2007

1. LEGAL STATUS AND NATURE OF BUSINESS

The bank was incorporated in Pakistan on December 20, 2004 as a public limited company under the Companies Ordinance, 1984.

The main objective of the bank is to carry on Islamic banking business in and outside Pakistan in accordance and in conformity with Islamic Shariah. The bank was granted an Islamic Banking License BL(i)-01(07), issued by the Banking Policy and Regulations Department of the State Bank of Pakistan vide their letter no. BPRD (LCGD-02)/625-76/D/2007/521 dated January 18, 2007 under section 27 of the Banking Companies Ordinance, 1962 read with Islamic Banking Department circular no. 2 of 2004. Subsequently, the bank was also granted approval for commencement of business as a scheduled bank with effect from February 13, 2007 by the State Bank of Pakistan vide their letter no. BPRD (LCGD-02)/625-76/X/JD/2007/1269 dated February 12, 2007.

The Bank was operating through ten branches as at December 31, 2007 (2006: zero). Its registered office is located at the Hotel Arcade, Sheraton Hotels and Towers, Karachi.

2. STATEMENT OF COMPLIANCE

These financial statements have been prepared in accordance with approved accounting standards as applicable in Pakistan. Approved accounting standards comprise of such International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board and Islamic Financial Accounting Standards (IFAS) issued by the Institute of Chartered Accountants of Pakistan as are notified under the Companies Ordinance, 1984, the requirements of the Companies Ordinance, 1984, Banking Companies Ordinance, 1962 or directives issued by the Securities and Exchange Commission of Pakistan and the State Bank of Pakistan. Wherever the requirements of the Companies Ordinance, 1984, Banking Companies Ordinance, 1962 or directives issued by the Securities and Exchange Commission of Pakistan and the State Bank of Pakistan differ with the requirements of IFRS or IFAS, the requirements of the Companies Ordinance, 1984, Banking Companies Ordinance, 1962 or the requirements of the said directives prevail.

The State Bank of Pakistan has deferred the applicability of International Accounting Standard (IAS) 39, 'Financial Instruments: Recognition and Measurement' and International Accounting Standard (IAS) 40, 'Investment Property' for Banking Companies through BSD Circular No. 10 dated August 26, 2002. Accordingly, the requirements of these standards have not been considered in the preparation of these financial statements. However, investments have been classified and valued in accordance with the requirements prescribed by the State Bank of Pakistan through various circulars.

2.1 Amendments to published standards and new interpretations effective in 2007

Amendment to IAS 1 - "Presentation of financial statements - Capital Disclosures", introduces certain new disclosures about the level of the bank's capital and how it manages capital. Adoption of this amendment has only resulted in additional disclosures which have been set out in note 39.1 of these financial statements.

Other new standards, amendments and interpretations that were mandatory for accounting periods beginning on or after January 1, 2007 and are not considered relevant or have any significant effect on the bank's operations, are not detailed in these financial statements.

During the year the Securities and Exchange Commission of Pakistan notified that the Islamic Financial Accounting Standard (IFAS 2) " Ijarah" issued by the Institute of Chartered Accountants of Pakistan shall be followed while accounting for ijarah transactions as defined by IFAS 2 for financial statements covering periods beginning on or after July 1, 2007. Consequently, this standard will be applicable on the financial statements of the bank for the year ending December 31, 2008. This standard requires that the 'Ijarah' transactions should be accounted for as operating leases in the books whereby assets leased out by the bank under Ijarah should be recorded as fixed assets in the books of the bank and should be classified separately according to the nature of such assets distinguished from the assets in the use of the bank. These assets should be depreciated over the term of the 'Ijarah'. Rental income should be recognized on accrual basis as and when the rental becomes due.

O Hotel

effective from July 1, 2009

effective from July 1, 2009

2

Currently, ijarah transactions are accounted for as a finance lease in the books of the bank whereby assets under ijarah arrangements are presented as a receivable at an amount equal to net investment in ijarah. Unearned income i.e. excess of aggregate rentals over the cost of the asset is recorded at the inception of the ijarah and is amortized over the term of the ijarah so as to produce a constant rate of return on net investment in ijarah.

2.2 Standards, interpretations and amendments to published approved accounting standards that are not yet effective

In addition to the above, the following standards, amendments and interpretations of approved accounting standards, effective for accounting periods beginning from the dates specified below are either not relevant to the bank's operations or are not expected to have significant impact on the bank's financial statements other than certain increased disclosures in certain cases:

IFRIC 11 - Group and Treasury Share Transactions

IFRIC 12 - Service Concession Arrangements

IFRIC 13 - Customer Loyalty Programmes

IFRIC 14 - IAS 19 - The limit on a Defined Benefit Asset, Minimum
Funding Requirements and their Interaction

IAS 1 - Presentation of Financial Statements (Revised September 2007)

IAS 23 - Borrowing Costs (Revised March 2007)

effective from March 1, 2007

effective from January 1, 2008

effective from January 1, 2008

effective from January 1, 2008

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

IFRS 3 (Revised) - Business Combinations

IAS 27 (Revised) - Consolidated and Separate Financial Statements

The preparation of financial statements in conformity with approved accounting standards requires management to make judgements, estimates and assumptions that affect the reported amounts of assets and liabilities and income and expenses. It also requires management to exercise judgement in application of its accounting policies. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. These estimates and assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of revision and future periods if the revision affects both current and future periods.

Significant accounting estimates and areas where judgements were made by the management in the application of accounting policies are as follows:

- i) classification of investments (notes 5.2 and 9)
- provision against investments (notes 5.2 and 9.3), financings (notes 5.3 and 10.6) and amounts due from financial institutions (note 8.2.2)
- iii) income taxes (notes 5.7, 12 and 28)
- iv) staff retirement benefits (notes 5.8 and 32)

4. BASIS OF MEASUREMENT

These financial statements have been prepared under the historical cost convention except for certain investments which have been carried at fair value and certain staff retirement benefits which are carried at present value.

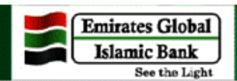

5. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

5.1 Cash and cash equivalents

Cash and cash equivalents comprise of cash and balances with treasury banks and balances with other banks in current and deposit accounts.

3.

5.2 Investments

The Bank classifies its investments as follows:

(a) Held for trading

These are securities, which are either acquired for generating a profit from short-term fluctuations in market prices, interest rate movements, dealers margin or are securities included in a portfolio in which a pattern of short-term profit taking exists.

(b) Held to maturity

These are securities with fixed or determinable payments and fixed maturity in respect of which the bank has the positive intent and ability to hold to maturity.

(c) Available for sale

These are investments, other than those in subsidiaries and associates, that do not fall under the held for trading or held to maturity categories.

Investments other than those categorized as held for trading are initially recognized at fair value which includes transaction costs associated with the investment. Investments classified as held for trading are initially recognized at fair value, and transaction costs are expensed in the profit and loss account.

All purchases and sales of investments that require delivery within the time frame established by regulations or market convention are recognized at the trade date. Trade date is the date on which the bank commits to purchase or sell the investment.

In accordance with the requirements of the State Bank of Pakistan, quoted securities other than those classified as 'held to maturity', investments in subsidiaries and investments in associates (which qualify for accounting under International Accounting Standard - 28), are subsequently re-measured to market value. Surplus / (deficit) arising on revaluation of quoted securities classified as 'available for sale', is taken to a separate account shown in the balance sheet below equity. Surplus / (deficit) arising on revaluation of quoted securities which are classified as 'held for trading', is taken to the profit and loss account. Investments classified as 'held to maturity' are carried at amortized cost.

Unquoted equity securities are valued at the lower of cost and break-up value. Break-up value of equity securities is calculated with reference to the net assets of the investee company as per the latest available audited financial statements. In cases where the break up value of such shares is less than the cost, the difference of the cost and break up value is classified as loss and provided for accordingly by charging to the profit and loss account.

Investments in subsidiaries and associates (which qualify for accounting under International Accounting Standard - 28) are carried at cost. However, where the break-up value of investment in subsidiaries and associates is less than the cost, the difference between the cost and the break-up value is provided for by changing to the profit and loss account.

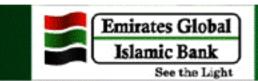

Provision for diminution in the values of securities (except debentures, participation term certificates and term finance certificates) is made after considering impairment, if any, in their value. Provision for diminution in value of debentures, participation term certificates and term finance certificates is made as per the requirements of the Prudential Regulations issued by the State Bank of Pakistan.

5.3 Financing

Financings are stated net of specific and general provisions against non-performing financings, if any, which are charged to the profit and loss account.

Under murabaha financing, funds disbursed for purchase of goods are recorded as 'advance for murabaha'. On culmination of murabaha i.e. sale of goods to customers, murabaha financings are recorded at the deferred sale price net of profit. Goods purchased but remaining unsold at the balance sheet date are recorded as inventories.

Ijarah financing is accounted for as a finance lease whereby assets under ijarah arrangements are presented as a receivable at an amount equal to net investment in ijarah. Unearned income i.e. excess of aggregate rentals over the cost of the asset is recorded at the inception of the ijarah and is amortized over the term of the ijarah so as to produce a constant rate of return on net investment in ijarah.

Specific provision against non-performing financing is determined in accordance with the Prudential Regulations and other directives issued by the State Bank of Pakistan. General provision against consumer financing is determined in accordance with the Prudential Regulations issued by the State Bank of Pakistan.

Financings are written off when there is no realistic prospect of recovery.

5.4 Inventories

As stated in note 5.3 to these financial statements, goods purchased but remaining unsold at the balance sheet date are recorded as inventories. The bank values its inventories at the lower of cost and net realizable value. Cost of inventories represents the actual purchase made by the customer as an agent on behalf of the bank from the funds disbursed for the purpose of culmination of murabaha.

The net realizable value is the estimated selling price in the ordinary course of business less the estimated cost necessary to make the sale.

5.5 Operating fixed assets and depreciation

Owned

Property and equipment, other than land, are stated at cost less accumulated depreciation and accumulated impairment losses (if any). Land and capital work-in-progress are stated at cost. All expenditures connected to the specific assets incurred during installation and construction period are carried under capital work-in-progress. These are transferred to specific assets as and when assets are available for use.

Depreciation is charged using the straight-line method in accordance with the rates specified in note 11.2 to these financial statements and after taking into account residual value, if any. The residual values, useful lives and depreciation methods are reviewed and adjusted, if appropriate at each balance sheet date. Depreciation on additions is charged from the month the assets are available for use while no depreciation is charged in the month in which the assets are disposed off

Gains / losses on sale of fixed assets are credited / charged to the profit and loss account.

Subsequent costs are included in the assets' carrying amount and recognized as a separate asset as appropriate, only when it is probable that future benefits associated with the item will flow to the bank and the cost of the item can be measured reliably. All other repairs and maintenance are charged to income as and when incurred.

Leased

Assets held under finance lease are stated at lower of fair value or present value of minimum lease payments at inception less accumulated depreciation. The outstanding obligation under lease is shown as a liability net of finance charges allocable to future periods.

The finance charges are allocated to accounting periods in a manner so as to provide a constant periodic rate of return on the outstanding liability.

Depreciation on assets held under finance lease is charged in a manner consistent with that for depreciable assets which are owned by the bank.

Intangible assets

Intangible assets having a finite useful life are stated at cost less accumulated amortization and accumulated impairment losses, if any. Intangible assets are amortized from the month, when these assets are available for use, using the straight line method, whereby the cost of the intangible asset is amortized on the basis of the estimated useful life over which economic benefits are expected to flow to the bank. The residual value, useful life and amortization method is reviewed and adjusted, if appropriate, at each balance sheet date.

Intangible assets having an indefinite useful life are stated at acquisition cost. Provisions are made for permanent diminution in the value of assets, if any. Gains and losses on disposals, if any, are taken to the profit and loss account.

5.6 Revenue recognition

Profit on murabaha transactions is recognized over the term of these transactions on a straight line basis.

The bank follows the finance method in recognizing income on ijarah contracts. Under this method the unearned income i.e. the excess of aggregate ijarah rentals over the cost of the asset is deferred and then amortized over the term of the ijarah, so as to produce a constant rate of return on net investment in ijarah. Gains/losses on termination of ijarah contracts are recognized as income on a receipt basis. Income on ijarah is recognized from the date of delivery of the respective assets to the mustajir.

Income earned from shariah non-compliant avenues is not recognized in the profit and loss account. This income is classified as charity payable in accordance with the recommendation of the Shariah Board.

Profit on diminishing musharaka is recognized on accrual basis.

Commission on letters of credit, acceptances and letters of guarantee is recognized on receipt basis.

Dividend income is recognized when the bank's right to receive the dividend is established.

Profit and loss on sale of investments is included in income currently.

5.7 Taxation

Current

Provision for current taxation is based on taxable income at the current rates of taxation after taking into consideration tax credits and rebates available, if any, or one half of one percent of turnover, whichever is higher. The charge for the current tax also includes adjustments, where considered necessary relating to prior years, arising from assessments finalized during the year.

Deferred

Deferred tax is recognized using the balance sheet liability method on all major temporary differences between the amounts attributed to assets and liabilities for financial reporting purposes and amounts used for taxation purposes. In addition, the Bank also records deferred tax asset on available tax losses. Deferred tax is calculated at the rates that are expected to apply to the period when the differences are expected to reverse, based on tax rates that have been enacted at the balance sheet date.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized.

The carrying amount of deferred tax asset is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the deferred tax asset to be utilized.

5.8 Staff retirement benefits

Defined benefit plan

The bank operates an approved funded gratuity scheme for all its permanent employees. Annual contributions are made to the scheme in accordance with the actuarial recommendation. The actuarial valuation is carried out using the projected unit credit method. Actuarial gains and losses at each valuation date in excess of the greater of 10% of the present value of the defined benefit obligation or 10% of the fair value of the plan assets are amortized over the average remaining working lives of the employees.

Defined contribution plan

The bank also operates a recognized contributory provident fund for all permanent employees. Equal monthly contributions are made, both by the bank and the employees, to the fund at a rate of 10 percent of basic salary.

5.9 Impairment

Ayro

The carrying amount of assets are reviewed at each balance sheet date for impairment whenever events or changes in circumstances indicate that the carrying amounts of the assets may not be recoverable. If such indication exists, and where the carrying value exceeds the estimated recoverable amount, assets are written down to their recoverable amount. The resulting impairment loss is taken to the profit and loss account.

5.10 Provisions, contingent assets and contingent liabilities

Provisions are recognized when the bank has a present legal or constructive obligation arising as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made. Provisions are reviewed at each balance sheet date and are adjusted to reflect the current best estimates.

Contingent assets are not recognized and are also not disclosed unless an inflow of economic benefits is probable. Contingent liabilities are not recognized and are disclosed unless the probability of an outflow of resources embodying economic benefits is remote.

5.11 Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the bank operates. The financial statements are presented in Pakistani Rupees, which is the bank's functional and presentation currency.

5.12 Foreign currency transactions

Transactions in foreign currencies are translated to rupees at the foreign exchange rates ruling on the transaction date. Monetary assets and liabilities in foreign currencies are expressed in rupee terms at the rates of exchange prevailing at the balance sheet date.

5.13 Financial assets and financial liabilities

Financial assets carried on the balance sheet include cash and balances with treasury banks, balances with other banks, due from financial institutions, financing and certain receivables.

Financial liabilities carried on the balance sheet includes bills payable, due to financial institutions, deposits and other accounts, liabilities against assets subject to finance lease and certain other liabilities.

Financial assets and financial liabilities are recognized at the time when the bank becomes a party to the contractual provisions of the instrument and de-recognized when the bank loses control of the contractual rights that comprise the financial assets and in the case of financial liabilities when the obligation specified in the contract is discharged, cancelled or expired.

5.14 Off-setting

Financial assets and financial liabilities are offset and the net amount is reported in the financial statements when there is a legally enforceable right to set off the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

5.15 Segment Reporting

A segment is a distinguishable component of the bank that is engaged either in providing products or services (business segment), or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments.

Business segments

(a) Corporate finance

Corporate banking includes, services provided in connection with mergers and acquisition, underwriting, privatization, securitization, research, debts (government, high yield), equity, syndication, IPO and secondary private placements.

(b) Trading and sales

It includes fixed income, equity, foreign exchanges, commodities, credit, funding, own position securities, lending and repos, brokerage debt and prime brokerage.

7.

(c) Retail Banking

It includes retail lending and deposits, banking services, trust and estates, private lending and deposits, banking service, trust and estates investment advice, merchant / commercial / corporate cards and private labels and retail.

(d) Commercial banking

Commercial banking includes project finance, real estate, export finance, trade finance, factoring, leasing, lending, guarantees, bills of exchange and deposits.

5.16 Geographical segments

Currently, the operations of the bank are carried out in Pakistan only.

5.17 Dividend and appropriation to reserves

Dividends and appropriation to reserves approved after balance sheet date, except appropriations which are required by the law, are recognized as liability in the Banks' financial statements in the year in which these are approved.

12.1 Through the Finance Act 2007, a new section 100A read with the 7th schedule (the Schedule) was inserted in the Income Tax Ordinance, 2001 for the taxation of banking companies. The schedule seeks to simplify the taxation of banking companies and is applicable from the tax year 2009 (financial year ending on December 31, 2008).

The 7th Schedule does not contain transitory provisions to deal with the disallowances made upto the year ended December 31, 2007. This issue has been taken up with the tax authorities through Pakistan Banks Association for formulation of transitory provisions to deal with the items which were previously treated differently under the then applicable provisions.

The deferred tax asset on the deductible temporary differences disallowed as a deduction in the past upto December 31, 2007 is being kept as an asset as the bank is confident that transitory provisions would be introduced to set out the mechanism of claiming where benefit of these allowances can be claimed.

32. DEFINED BENEFIT PLAN

32.1 General description

As mentioned in note 5.8 the bank operates funded gratuity scheme for all its permanent employees. The benefits under the gratuity scheme are payable on retirement at the age of 60 or earlier cessation of service, in lump sum. The benefit is equal to one month's last drawn salary for each completed year of service, subject to a minimum of three years of service.

32.2 Principal actuarial assumptions

The latest actuarial valuation was carried out as at December 31, 2007 using the "Projected Unit Credit Actuarial Cost Method". The main assumptions used for actuarial valuation were as follows:

35. FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

In the opinion of the management, the fair value of the financial assets and liabilities are not significantly different from their carrying values since assets and liabilities are either short term in nature or in the case of investment in sukuk certificates, customer financings and deposits are frequently repriced.

The repricing profile, effective rates and maturity are stated in note 40 to these financial statements.

36.1 Comparative information in respect of segment details is not relevant as the bank started its operations in the current year.

37. TRUST ACTIVITIES

The bank is not engaged in any significant trust activities. However, the bank acts as security agent for some of the Sukuk issues and Syndicate Islamic Structured Finances that the bank had arranged and/or distributes on behalf of its customers.

38. RELATED PARTY TRANSACTIONS

38.1 The bank has related party relationship with its associated undertaking (refer note 9.4), employee benefit plan (refer note 32) and its directors and key management personnel.

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the bank.

Contributions to and accruals in respect of staff retirement benefit plan are made in accordance with the actuarial valuations / terms of the contribution plan (refer note 32 to these financial statements for the details of the plan). Remuneration to the executives, disclosed in note 34 to these financial statements are determined in accordance with the terms of their appointment.

38.2 Details of transactions with related parties during the year, other than those which have been disclosed elsewhere in these financial statements, are as follows:

39. CAPITAL ADEQUACY

39.1 Capital Management

The objective of managing capital is to safeguard the bank's ability to continue as a going concern, so that it could continue to provide adequate returns to shareholders by pricing products and services commensurately with the level of risk. It is the policy of the bank to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The impact of the level of capital on shareholders' return is also recognized and the bank recognizes the need to maintain a balance between the higher returns that might be possible with greater gearing and the advantages and security afforded by a sound capital position.

Asto

Jan.

Goals of managing capital

The goals of managing capital of the bank are as follows:

- To be an appropriately capitalized institution, as defined by regulatory authorities and comparable to the peers;
- Maintain strong ratings and to protect the bank against unexpected events;
- Availability of adequate capital at a reasonable cost so as to enable the bank to expand; and achieve low overall
 cost of capital with appropriate mix of capital elements.

Statutory minimum capital requirement and management of capital

The State Bank of Pakistan vide circular no. 6 dated October 28, 2005 had raised the requirement of minimum paid up capital of banks to Rs 6 billion (net of losses) to be achieved upto December 31, 2009 in a phased manner. The requirement in respect of minimum paid up capital (net of losses) to be achieved by December 31, 2007 as per the aforementioned circular is Rs 4 billion. However, as at December 31, 2007, the paid up capital (net of losses) of the bank amounted to Rs 2,811.7 million. The Board of Directors in their meeting held on August 22, 2007 had approved to increase the paid up capital of the bank from Rs 3 billion to Rs 4.5 billion through a right issue. However, only an amount of Rs 1,007.855 million had been received upto December 31, 2007 in respect of the right issue.

The State Bank of Pakistan vide its letter no . BSD/SU-1/608/104/2008 dated January 16, 2008 advised the management to meet the capital requirement of Rs 4 billion not later than January 31, 2008. Consequently, the Board of Directors in their meeting held on January 29, 2008 had approved to allot shares to the members in respect of the share subscription money amounting to Rs 1,239.428 million received upto the date of the meeting. Accordingly, the paid-up capital of the bank subsequent to the year ended December 31, 2007 has been increased to Rs 4,239.428 million.

Bank's regulatory capital analyzed into two tiers.

Tier 1 capital, includes fully paid up capital (including the bonus shares), balance in share premium account, general reserves as per the financial statements and net un-appropriated profits, etc after deductions for investments in the equity of subsidiary engaged in banking and financial activities and deficit on revaluation of available for sale investments.

Tier 2 capital, includes general provisions for loan losses (up to a maximum of 1.25% risk weighted assets), reserves on the revaluation of fixed assets and equity investments (up to a maximum of 50% the balance in the related revaluation reserves), foreign exchange translation reserves), etc.

The Capital of the bank is managed keeping in view the minimum "Capital Adequacy Ratio" required by SBP through BSD Circular No. 6 dated October 28, 2006. The adequacy of the capital is tested with reference to the risk-weighted assets of the Bank.

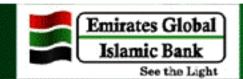

The required capital adequacy ratio (8% of the risk-weighted assets) is achieved by the bank through improvement in the asset quality at the existing volume level, ensuring better recovery management and striking compromise proposal and settlement and composition of asset mix with low risk. Banking operations are categorized as either trading book or banking book and risk-weighted assets are determined according to specified requirements of the State Bank of Pakistan that seek to reflect the varying levels of risk attached to assets and off-balance sheet exposures. The total risk-weighted exposures comprise the credit risk and market risk.

The calculation of Capital Adequacy enables the bank to assess the long-term soundness. As the bank carries on the business on a wide areas network basis, it is critical that it is able to continuously monitor the exposure across the entire organization and aggregate the risks so as to take an integrated approach / view.

The allocation of capital between specific operations and activities is, to a large extent driven by the optimization of the return achieved on the capital allocated. Although maximization of the return on risk-adjusted capital is the principal basis used in determining how capital is allocated within the bank to particular operations or activities, it is not the sole basis used for decision making. Account also is taken of synergies with other operations and activities, etc. and the fit of the activity with the bank's long term strategic objectives. The bank has complied with all externally imposed capital requirements throughout the period. Further there has been no material change in the bank's management of capital during the period.

Notes

Weightages as mentioned in BSD circular no. 12 dated August 25, 2004 have been applied to their respective "book value" to arrive at "risk values".

The amount of cash margins and deposits held against performance bonds, acceptances and standby letter of credit aggregates Rs 9.806 million has been deducted.

Lien on deposit amounting to Rs 609.035 million held against guarantee, letter of credit and acceptances has been deducted.

Comparative information in respect of risk weighted assets to capital ratio is not relevant as the bank started its operations in the current year.

A) 39.3

40. RISK MANAGEMENT

This section presents information about EGIBL's exposure to and its management and control of risks, in particular the primary risks associated with its use of financial instruments:

- Credit risk is the risk of loss resulting from client or counterparty default
- Market risk is exposure to market variables such as interest rates, exchange rates and equity indices
- Liquidity risk is the risk that EGIBL may be unable to meet its payment obligations when due
- Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events, and therefore includes legal risk

Representations of risk are for a given period and EGIBL's risk management will constantly evolve as its business activities change in response to credit, market, product and other developments. The bank manages the risk through a framework of risk management, policies and principles, organizational structures and risk measurement and monitoring processes that are closely aligned with the business activities of the bank.

Risk management principles

- The board of directors (the Board) provides overall risk management supervision. The Board risk management committee regularly monitors the bank's risk profile.
- The bank has set up objectives and policies to manage the risks that arise in connection with the bank's activities. The risk management framework and policies of the bank are guided by specific objectives to ensure that comprehensive and adequate risk management policies are established to mitigate the salient risk elements in the operations of the bank.
- The establishment of the overall financial risk management objectives is consistent and tandem with the strategy to create and enhance shareholders value, whilst guided by a prudent and robust framework of risk management policies.
- The structure of risk management function is closely aligned with the organisational structure of the bank.

Risk management organisation

The Board of Directors through its sub-committee called 'Board Risk Management Committee' (BRMC) oversees the overall risk of the bank. The Risk Management Department (RMD) is the organizational arm performing the functions of identifying, measuring, monitoring and controlling the various risk and assists the Apex level committee and the various sub-committees in conversion of policies into action.

The Board Risk management committee comprises of three non executive directors and the Chief Risk Officer. One of the non executive directors of the bank chairs the risk management committee, which is responsible for planning, management and control of the aforementioned risks of the bank.

The Board Risk management committee has delegated some of its tasks of risk management to sub committees which are as follows:

Name of the committee

Chaired by

Credit committee
Asset and liability management committee (ALCO)
Audit committee

President & CEO President & CEO Non executive director

Credit committee is responsible for approving and monitoring all financing transactions and also the overall quality of the financing portfolio. For this purpose it has formulated credit policy so as to effectively monitor the risk profile of the bank's asset portfolio and to ensure strict adherence to the State Bank of Pakistan's Prudential Regulations, Banking Companies Ordinance, 1962 and any other regulatory requirement.

The Board has constituted an audit committee. The audit committee works to ensure that the best practices of the code of corporate governance and other policies and procedures are being complied with.

The bank's risk management, compliance and internal audit and legal departments support the risk management function. The role of the risk management department is to quantify the risk and the quality and integrity of the bank's risk-related data. The compliance department ensures that all the directives and guidelines issued by State Bank of Pakistan (SBP) are being complied with in order to mitigate the compliance and operational risks. Internal audit department reviews the compliance of internal control procedures with internal and regulatory standards.

Apro

40.1 Credit risk

Credit risk is the risk of loss to EGIBL as a result of failure by a client or counterparty to meet its contractual obligations. Exposure to credit risks for the bank arises primarily from lending activities.

The management of credit risk is governed by credit policies approved by the board. The procedures set out the relevant approval authorities, limit, risks, credit ratings and other matters involved in order to ensure sound credit granting standards.

The bank has a well defined credit structure duly approved by the board under which delegated authorities at various levels are operating and which critically scrutinize and sanction credit. The emphasis is to provide short to medium term trade related financings to reputable names, which are self liquidating and shariah compliant. The risk appraisal system of the bank has enabled it to build a sound portfolio.

The bank classifies a claim as impaired if it considers it likely that it will suffer a loss on that claim as a result of the obligor's inability to meet its commitments (including profit payments, principal repayments or other payments due) after realization of any available collateral. Allowances or provisions are determined in accordance with the requirements of SBP. The authority to establish allowances, provisions and credit valuation adjustments for impaired claims, is vested in Credit Administration Department and is according to SBP regulations. Details are given in note 10 to these financial statements.

40.1.2 Details of non-performing advances and specific provisions by class of business segment and sector

The bank does not have any non-performing financings as at December 31, 2007 and accordingly no specific provision is held.

40.1.3 GEOGRAPHICAL SEGMENT ANALYSIS

The bank conducts its operation in Pakistan only.

40.2 Market Risk

Market risk is the risk of losses due to on and off balance sheet positions arising out of changes in the market prices. Market risk mainly arises from trading activities undertaken by the bank's treasury. It also includes investment and structured positions in the banking book. To manage and control market risk a well defined limits structure is in place. These limits are reviewed, adjusted and approved periodically.

The bank has established a Treasury Middle Office to effectively monitor day-to-day trading activities of the dealing room. It has to ensure monitoring and implementation of market risk and other policies, limits monitoring, escalation of any deviation to senior management, and MIS reporting, etc.

40.2.1 Foreign Exchange Risk

		20	07			20	06	
	Assets	Liabilities	Off- balance sheet items	Net foreign currency exposure	Assets	Liabilities	Off- balance sheet items	Net foreign currency exposure
		Rupees	in '000			Rupees	in '000	
Pakistan rupee	8,908,744	5,006,659	(185,534)	3,716,551	2,448,298	88,624	124	2,359,674
United States dollar	16,584	100,312	48,847	(34,881)	74	121	323	- 2
Great Britain pound	10,891	9,790	. w.	1,101	1	190	1	~
Euro	5,256	5,159	136,687	136,784				
	8,941,475	5,121,920	2	3,819,555	2,448,298	88,624	11.7*	2,359,674

Foreign exchange risk arises from the fluctuation in the value of financial instruments consequent to the changes in foreign exchange rates. The bank manages this risk by setting and monitoring dealer, currency, inter exposures, stop loss and counter party limits for on and off balance sheet financial instruments.

The exposures of the bank to foreign exchange risk is also restricted by the statutory limit on aggregate exposure prescribed by the State Bank of Pakistan.

40.2.2 Equity position risk

Equity position risk is the risk arising from taking positions, in the trading book, in the equities and all instruments that have a market behaviour similar to equities.

Counter parties limits, as also fixed by the State Bank of Pakistan, are considered to limit risk concentration. The bank invests in those equities which are Shariah compliant as advised by the Shariah adviser.

40.2.3 Mismatch of interest rate sensitive assets and liabilities

Surplus/(Deficit) on revaluation of assets

Unappropriated Loss

Liquidity Risk

Liquidity risk is the potential for loss to the bank arising from either its inability to meet its obligations or to fund increases in assets as they fall due without incurring an unacceptable cost. Asset Liability Committee (ALCO) has the responsibility for the formulation of overall strategy and oversight of the assets liability management function. ALCO monitors the maintenance of balance sheet liquidity ratios, depositor's concentration both in terms of overall funding mix and avoidance of reliance on large individual deposits. The

0.4 Operational Risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and system or from external events.

The bank ensures that the key operational risks are managed in a timely and effective manner by raising awareness of operational risk, improving early warning information and allocating risk ownership and responsibilities. The bank has developed policies, guidelines and manuals necessary for the mitigation of operational risk.

The bank is also supervised by the Shariah Supervisory Board which sets out guidelines, policies and procedures for the bank to ensure that all its activities and products are sharish compliant. The internal audit function of the bank performs regular audit on various operations of the bank and monitors the key risk exposure areas to ensure that internal control procedures are in place and those procedures are able to mitigate risk associated with operational activities. A business continuity program and a disaster recovery plan have also been formulated and approved by the board of directors to ensure uninterrupted flow of operations of the bank.
